EDUCATION

Missouri University of Science and Technology

May 2027

Bachelor of Science in Information Science and Technology, Minor in Business

Courses:

- | | | |
|-----------------------------|----------------------------------|-----------------|
| - Network and Info Security | - Management Information Systems | - Statistics |
| - Web Development | - Digital Logic | - ERP |
| - Financial Accounting | - Computational Solving | - Discrete Math |

TECHNICAL SKILLS

Languages: Python, C++, C, HTML, CSS, Assembly

Developer Tools: VS Code, Visual Studio, Microchip Studio, Wireshark

EXPERIENCE

IT Assistant

May 2023 – Aug 2023

Lyons Township High school

La Grange, IL

- Executed comprehensive maintenance for over 100 workstations, performing OS updates, software patches, and hardware diagnostics to ensure 100% operational efficiency for faculty and students
- Performed preventative and corrective maintenance on IT hardware, including critical infrastructure, internal component upgrade, peripheral troubleshooting. and cable management for hardware longevity
- Facilitated the intake and inventory of enterprise-grade server infrastructure valued at over \$50,000, ensuring all components were accounted for and staged for deployment

LEADERSHIP

Coding Instructor

May 2020 – Aug 2020

Park Junior High School

La Grange, IL

- Conveyed fundamental computer science concepts into age-appropriate analogies for young learners; resulted in 100% of students successfully deploying original interactive games.
- Guided students through a step-by-step debugging process to identify logic bugs within their scripts, increasing student self sufficient and reducing technical blockers
- managed a classroom of 32 students with varying aptitude adapting lessons and tasks in real time to provide goals for advanced learners while ensuring foundational mastery for all

KMNR DJ

April 2024 – Present

Missouri University of Science and Technology

Rolla, MO

- Overseeing a 1-2 hour weekly slot, ensuring 100% "on-air" up time and adherence to FCC regulations regarding content and station identification.
- Real Time Problem solving of audio hardware and digital broadcasting software to maintain professional sound quality
- Wrote, recorded, and produced 10+ original Public Service Announcements (PSAs) to raise awareness for campus initiatives

PROJECTS

Embedded systems

Sep 2024 – Oct 2024

Utilized assembly and C to control LED's on an AVR micro controller

- Integrated timers and counters to manage real-time events and implementing interrupt service routines to handle system alerts in order to retain core process flow
- collaborated with team members to de-bug cross language compatibility and issues and deliver a functional prototype

ACTIVITIES

- ACM Security - Cybersecurity lectures and CTF events
- Esports Team Coordinator - Worked within competitive teams to coordinate effective strategies
