

[\(doc link\)](#)

Group 7: Damon Leach

Instructions Draft

(Deck Crawler)

WARNING :

The game contains small items that should be kept out of reach of children under 4 years of age or individuals with [Hyperorality](#).

Materials List:

- (1) Deck(s) of Cards(size of 52)
- (1) 6-Sided Die
- (1) 20-Sided die

Definitions:

- **Boss Deck** - The deck on the right hand side of your playing field, The **Boss Deck** is only drawn after clearing 3 floors
- **Dungeon Deck** - The deck on the left hand side of your playing field, The Dungeon Deck is what you create your floors with
- **Health Points (HP)** - The total amount of life you have
- **Floor** - The 4 card turn you perform after starting the game, or clearing the floor
- **Weapon** - Diamond cards, their numerical value is the strength of the weapon
- **Health Potion** - Heart cards, their numerical value halved is the amount healed

Instructions:

Phase 1 (Deck Construction):

1. **Separate the decks:** divide a standard 52-card deck into two distinct piles: the **Dungeon Deck** (number cards 2-10 and Jockers) and the **Boss Deck** (Jacks, Queens, Kings, and Aces).
2. **Assign Suit Roles:** Each Suit will have an established function: **Spades/Clubs** are Monsters, **Diamonds** are Weapons, and **Hearts** are Heath Potions.
3. **Prepare the Hero:** set your Hero's Heath Point (HP) to 10 using a d20 and your “Base Attack” as 0 (unarmed).
4. **Shuffle:** Independently Shuffle both the Dungeon and The Boss Deck.

Phase 2: Stepping through the dungeon (Flip the Cards)

5. **Layout the Room:** Deal four cards face-up front the Dungeon Deck in a horizontal row. This represents the current “Floor”.

6. **Scan for Jockers:** If a Jocker appears in the layout, you may choose to trigger a Mulligan immediately (reshuffle all face-up cards and the joker back into the deck) or save it for the end of the floor.

7. **Choose the Order:** you may resolve the four cards in any order you choose. Tip: equipping a weapon (diamond card) before engaging a Monster (Spade/Club).

Phase 3: Standard Play (The Round)

8. **Collect Loot:** If you select a Diamond, replace your current weapon value with the card’s rank. If you select a Heart, heal equal to half the card’s rank (rounded up).

9. **Initiate Combat:** If you select a Spade or Club, compare its rank (monster Strength) to your current weapon value.

9a. **The Combat Roll:** Roll a single 1d6. Calculate your total power: $WeaponValue + 1d6 = TotalPower$.

9b. **Resolve Clash:** If Total Power $\geq$ Monster Strength, the monster is defeated, if not subtract the difference from your HP(d20).

10. **Clear the Floor:** Once all four cards in the room are resolved (discarded), the standard round ends.

(Fig 2)
With your floor laid out, your next step is to analyze the scenario and decide to loot the weapon, fight the monsters, and heal.

Phase 4: The Event Round (Boss Encounter)

13. **Draw the Boss:** Immediately after clearing 3 floors, draw the top card from the Boss Deck.

13a. **Apply Boss Modifier:** Check the rank of the Boss card (all but aces have HP of 10).

-**Jack** (The Skirmisher): Fast Reflexes. You must roll your 1d6 twice and use the lower result. You only need to win one clash to win.

-**Queen** (The Necromancer): Vampiric Drain. If you lose the clash, the Queen places the most recently slain monster into the top of the deck.

-**King** (The OverLord): Heavy Plate The King is immune to your attack if your 1d6 attack roll is a 3 or less.

-**Ace** (The Void): Pure Chaos. Before rolling, flip the top card of the Dungeon Deck. Add the card's value to the ace's base strength (12).

(Fig 3)
You've Arrived at the boss!
Pay close attention to the unique trait each face card possess...

15. **Execute Boss Battle:** Perform the Combat Roll (step 10) against the Boss Strength.

16: **Claim the Suit Reward:** If the Boss is defeated you gain a permanent or immediate reward depending on the suit of the Boss card:

-Spaces: Combat Training. Gain a permanent +1 to all future combat rolls; place cards beside your weapon.

-Clubs: Momentum. Immediately flip the next 4 cards of the Dungeon Deck; you may discard any amount

-Hearts: Holy Blessing. Fully restore your HP to 10(d20)

-Diamonds: Masterwork. Add +3 to your weapon value; place card underneath your weapon.

17. **The Dungeon Conquered:** If either decks are exhausted, the game immediately ends as you have cleared the dungeon.
